Summary

Frontend Engineer with 6+ years of experience, working with React and TypeScript for the last six. Expert in HTML5, CSS/SCSS, responsive layouts and component-driven architecture, with solid unit and integration testing habits and a testing pyramid mindset. Comfortable with performance optimization (lazy loading, bundle splitting, render control), API integration over REST, GraphQL and WebSockets with careful error and edge-case handling, and web security basics (OWASP, OAuth, JWT). Run code reviews, mentor teammates and think about products, not just tickets.

Technical Skills

TypeScript, JavaScript (ES6+), React, Next.js (SSR), HTML5, CSS3, SCSS, Responsive Design, styled-components, Tailwind, Redux, Redux Toolkit, MobX, Zustand, React Query, REST API, GraphQL, WebSocket, OAuth 2.0, JWT, OWASP, Node.js, Express, Jest, React Testing Library, Karma, Jasmine, Cypress, Storybook, Feature Flags, Webpack, Vite, ESLint, Prettier, npm/pnpm, Git, CI/CD, Docker

Experience

Senior Frontend Developer

Aug 2024 – present

BrainRocket

Spain, Valencia

- Design and maintain scalable frontend services in React, Next.js and TypeScript, writing clean, documented code that follows team standards.
- Cover new features with Jest and React Testing Library, and maintain the Karma/Jasmine suite inherited with the older part of the codebase.
- Built a client-area platform with two-factor authentication, role-based access and secure delivery of documents - security and auth flows are a regular part of my work.
- Take part in technical discussions and architectural decisions; collaborate with product managers, designers and backend engineers.
- Conduct technical interviews for React developers, review merge requests and mentor teammates.

Frontend Developer

Aug 2022 – Aug 2024

Libertex Group

Montenegro, Podgorica (Remote)

- Optimised application performance with lazy loading, bundle splitting and render control, and rolled changes out behind feature flags - sales conversion went up 50%, confirmed with A/B tests.
- Integrated REST and GraphQL APIs and real-time WebSocket data, with error handling and edge cases covered for unstable connections.
- Built a scalable micro-frontend architecture (Module Federation) and a Node.js backend layer aggregating data from several services.
- Refactored 30+ legacy modules to TypeScript and modern standards, raising unit and integration test coverage (Jest, React Testing Library).

Frontend Developer

Sep 2021 – Aug 2022

SofIT

Russia, Saint Petersburg (Remote)

- Built a component-driven UI Kit of 25+ reusable components documented in Storybook, which standardised the interface and cut feature development time by around 30%.
- Developed responsive interfaces with HTML, SCSS and Tailwind (React, TypeScript, MobX), including interactive Canvas and SVG views.
- Configured build tooling (Webpack, Vite, ESLint) and cut bundle size by 10%.

Frontend Developer

Jun 2019 – Sep 2021

Information Technology Center

Russia, Blagoveshchensk

- Built responsive, cross-browser interfaces for a public portal serving 10,000+ daily users (React, Redux, TypeScript, SCSS).
- Implemented a JWT authorisation service with role-based access control on top of a PHP backend.
- Worked with Git and PR workflows; deployed in Docker containers as part of the release process.

Education

Blagoveshchensk State Pedagogical University

Russia

Bachelor of Information Technology

Aug 2015 – Jun 2019
